

The Invest4Health SCI package

Supporting health promotion and disease prevention initiatives to scale

The SCI package aims to support initiative operators, project managers, and decision makers working on developing and implementing initiatives in the field of health promotion and disease prevention.

It can help build multi-stakeholder business and operational models, as well as co-governance mechanisms to enable the long-term sustainability of the initiatives

A Social Franchising model that can support the uptake of SCI across Europe has been developed by the I4H team. More information can be found on the project website:

<https://invest4health.eu/>

SCI package overview

SCI knowledge base

The complete body of knowledge and research on SCI produced by the I4H consortium

SCI toolkit for initiatives

Practical tools for SCI implementation in diverse health interventions, covering self- and need assessment, evaluation, and business model development

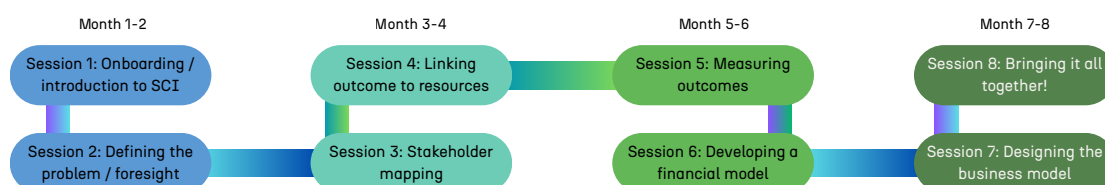

Competence building and expert support

Competence-building sessions and expert support on SCI to help teams design, sustain, and scale initiatives through innovative business and financing models

Digital I4H Collaborative Platform

A prototype digital platform supporting initiatives with competence building, stakeholder engagement, co-governance, performance monitoring and simulation

SCI competence building programme

LET'S GO!

Potential Invest4Health support options

Programme participant

- Your goal: Scale initiative to your target population.
- Our offer: SCI competence building programme.

Member

- Your goal: Scale initiative to your target population.
- Our offer: Community of practice on SCI (continued expert support, updated materials, peer-to-peer learning, continued access to I4H collaborative platform.)

Franchisee

- Your goal: Be a changemaker and create a local ecosystem.
- Our offer: Training and support to deliver the SCI competence building programme (e.g. operational support, digital infrastructure, marketing materials, branding, business model).

Are you interested in developing a business model to scale your initiative, or generate an ecosystem of initiatives for better citizen health and well-being in your region? Contact us!
